

Sr. Prompt Engineering Specialist

Job ID 391394BR Jun 27, 2024 India

Summary

Location: Hyderabad This role would require a deep understanding of Generative AI, the pharmaceutical industry, and the specific needs and challenges our industry faces in order to successfully deliver products that meet these objectives.

About the Role

Your responsibilities include but not are limited to

- Develop, test, and implement prompt engineering systems and solutions.
- Collaborate with cross-functional teams to understand project objectives and requirements.
- Investigate and implement new technologies to improve prompt engineering systems.
- Monitor system performance and troubleshoot issues to ensure optimal functionality and efficiency.
- Document all processes, make necessary adjustments, and provide prompt support when needed.
- Train other team members on the use of prompt engineering systems and technologies.
- Ensure all prompt engineering projects are completed on time and within budget.

Minimum Requirements

- A bachelor's degree in a relevant field such as computer science, data science, engineering, or a life sciences-related discipline. A master's degree or MBA could be advantageous but is not always mandatory.
- 8 years of relevant professional IT experience in a technology driven or AI related fields
- Strong understanding of engineering principles and prompt technologies
- Solid understanding of artificial intelligence, specifically generative AI is essential
- Familiarity with AI development process, data science, and machine learning concepts
