Apr 24, 2024
India

Summary

Laboratory Excellence and Operation (LEO) and Biomarker Science and Operation (BSO) team in India are the key global resources for Line functions (LF) and Translational Medicine (TM) Clinical Trial Teams for biomarkers including biomarker outsourcing, scientific biomarker monitoring, vendor management, biomarker logistics, clinical site communication and sample coordination. LEO/BSO are working in close collaboration with clinical teams, LF technology experts, Biomarker Leads (BMLs) as well as external service providers (ESP) including central labs and clinical sites.

About the Role

Your responsibilities include, but are not limited to:

- Independently provide operational support to Biomarker Study Experts and clinical studies focusing on biomarker samples and including reviews of clinical study protocol, preparing site operations manuals, informed consent forms, sample collection table, instruction manual, central lab protocol/manual, and eCRF and other biomarker sample operation logistics and coordination including study setup, sample tracking/reconciliation, assay and vendor set up, sample/data upload and study closure
- Support data transfer and data flows in LIMS and DTS (e.g. study creation, data flow, data transfer, etc.) for managed biomarkers and studies.
- Update study and project information in relevant reports and IT systems
- Independently identify and resolve sample management and sample discrepancy issues
- Identify, and escalate issues, ESP, quality or performance issues and engage LF experts/SME, clinical trial leaders and data management as needed.
- Contribute to the best practices, process.
- Continuous improvement initiatives and innovations in sample management functions
- Collaborate with other TM, BMD and GCO functions

- BS in life science with 4+ years of clinical operations experiences and/or clinical bioanalysis and/or clinical biomarkers. Advance degree with 2 years in clinical operations and/or clinical bioanalysis and/or clinical biomarkers

- Operational knowledge of *clinical trials: clinical study set up, clinical sample management, clinical sample analysis and managing external service provider (ESP) including central laboratories and/or specialized vendors*
- Laboratory background and knowledge immunoassay and/or bioanalysis
- Knowledge of the drug development process, clinical biomarkers and working with translation clinical research.
- Strong project and time management skills, problem solving, communication and leadership skills.

- Knowledge of regulatory requirements e.g. ICH/GCP, GLP, etc.

WHY NOVARTIS

769 million lives were touched by Novartis medicines in 2020, and while we're proud of this, we know there is so much more we could do to help improve and extend people's lives.

We believe new insights, perspectives and ground-breaking solutions can be found at the intersection of medical science and digital innovation. That a diverse, equitable and inclusive environment inspires new ways of working.

We believe our potential can thrive and grow in an unbossed culture underpinned by integrity, curiosity and flexibility. And we can reinvent what's possible, when we collaborate with courage to aggressively and ambitiously tackle the world's toughest medical challenges. Because the greatest risk in life, is the risk of never trying! Imagine what you could do here at Novartis!

Commitment to Diversity & Inclusion:

Novartis is committed to building an outstanding, inclusive work environment and diverse team's representative of the patients and communities we serve.
