Summary

We are seeking an experienced Automation Engineer cum Developer to join our dynamic team. In this role, you will play a crucial part in designing, implementing, and maintaining automation solutions across our organization. You'll collaborate with cross-functional teams to enhance efficiency, streamline processes, and drive innovation. If you're passionate about automation, coding, and problem-solving

About the Role

- **Automation Development:**
- **Design, develop, and implement automation solutions for various business processes.**
- **Create and maintain automation frameworks, scripts, and tools.**
- **Collaborate with stakeholders to identify areas for automation and process improvement.**
- **Software Development:**
- **Write clean, efficient, and maintainable code.**
- **Collaborate with software developers to integrate automation solutions into existing systems.**
- **Ensure seamless communication between automated processes and other software components.**
- **Testing and Quality Assurance:**
- **Conduct thorough testing of automation software to identify and resolve any issues.**
- **Perform unit, functional, regression, integration, and performance testing.**
- **Document test results and compile metrics.**

- **Process Optimization:**
- **Analyze existing processes and identify opportunities for automation.**
- **Propose innovative solutions to enhance productivity and reduce manual effort.**
- **Continuously monitor and improve automated systems.**
- **Collaboration and Communication:**
- **Work closely with cross-functional teams, including developers, QA engineers, and business analysts.**
- **Communicate effectively to express ideas, report bugs, and provide solutions.**
