

# Postgraduate in Pharmaceutical Development

Job ID  
REQ-10011789  
Jun 27, 2024  
Switzerland

## Summary

In pharmaceutical development, we aim to develop and implement innovative pharmaceutical technologies to make a difference to patients around the world. We are looking for a Postgraduate to join the Pharmaceutical Development (PHAD) who will be part of the cross functional teams working in a highly collaborative and scientific environment focusing on the formulation, particle engineering and characterization of dosage forms of chemical and biologics entities, and how this translates to the production of innovative pharmaceuticals. Preferred start date: asap Duration: 12 months

## About the Role

### Major accountabilities:

- Performing feasibility and development of novel dosage forms to establish new formulation platforms for subcutaneous drug delivery.
- Developing and assessing performance of novel process technologies for product improvement
- Analytical characterization of material properties to improve formulation and process
- Planning, performing, interpreting experiments and regularly aligning with our experts in the field according to project goals and milestones
- Be an accountable contributor to increase formulation understanding and accelerate product development timelines by conducting experiments and presenting results in internal meetings.

### Minimum Requirements:

Education: Recent M.Sc. graduate or enrolled Master Student in e.g. Pharmacy, Pharmaceutical Engineering, Chemical Engineering

- Languages: Strong communication skills in English

### Skills:

- Strong knowledge in formulation, pharmaceutical technology/processing and/or physicochemical properties / pharmaceutical material sciences (e.g. powder characterization) is regarded as an asset
- Hands-on experience and motivation to work in a laboratory environment is required
- You have a scientific and creative mindset, constantly eager to expand your knowledge and establish new formulation and process technologies
- Organizational skills, including planning and execution of laboratory work (process and characterization)
- Ability to work in multidisciplinary teams in an international environment, strong communication and

collaboration skills are regarded as the basis

- While you are a strong team player and role-model in collaboration, the ability to work independently will be valued.

### **Languages :**

- English.
