Jul 11, 2024
Czech Republic

Summary

Novartis is unable to offer relocation support for this role: please only apply if this location is accessible for you. Security Engineering team will be collaborating with across multiple regions with an opportunity to work on developing security vendor technologies! Your role as Security Engineer (Network Security) is responsible for delivery and deployment of solutions, practices and processes required by IT services and/or applications according to business needs; overall design and coordination of information technology and understanding how architectures, strategies, designs and plans fit together.

About the Role

Responsibilities for this role include, but are not limited to:

- Collaborating closely with service lines and architecture to deliver PoC, pilots and successful implementation of new IT solutions. Build/maintain comprehensive documentation as it relates network & Security topology, equipment, and configuration(s)
- Shape, design, and plan security blueprint within including customer meetings, product development/management/marketing review, and systems integration lab work. Drive the partner specific certification processes.
- Provide Level 4 support for problems identified with systems and network; and act as a partner concern for Level 3 and Level 4 Managed Services support technicians
- Build, request, and present technical specifications and requirements for purchasing of security equipment via quote procedure. Participate in after-hours upgrades, troubleshooting, and/or on-call availability as needed
- Configure, test, and maintain security equipment and services, including ZTNA solutions, SASE platform (Netskope, Zscaler), Cloud based proxy solutions.
- Assist with monthly reports and recommendations for Managed Services Clients and work with third party vendors as liaison between client and vendor
- Developing solutions independently and leading specific initiatives to deliver tactical results with managerial support where required.

Commitment to Diversity & Inclusion: :

We are committed to building an outstanding, inclusive work environment and diverse teams representative of the patients and communities we serve.

What you'll bring to the role:

- 2-3 years of prior IT experience, ideally in network security design and implementation
- Proficiency in security technologies (Splunk), including proxies and SASE (Netskope, Zscaler) based solutions and general networking background.
- Ability to work independently, prioritizes existing projects, and proactively resolve areas requiring additional attention, monitoring, or maintenance. Strong documentation skill
- Proficient English
