

# Business Analyst – Biomedical research with Generative AI Expertise

Job ID

REQ-10012591

Jul 02, 2024

India

## Summary

This role will involve collaborating with multi-functional teams to identify business needs, analyze complex data, and provide insights that drive strategic decision-making and operational improvements.

## About the Role

### Your responsibilities include but are not limited to

- **Domain Expertise:**

- Apply in-depth knowledge of biomedical research processes, including chemical, pre-clinical, and clinical stages, to provide valuable insights and recommendations.
- Stay updated with the latest advancements in the biomedical field and AI technologies, ensuring the application of cutting-edge solutions.

- **Business Analysis:**

- Collaborate with customers to gather and document business requirements, ensuring alignment with organizational goals.
- Conduct thorough analyses of business processes, identifying areas for improvement and optimization.
- Develop business cases, feasibility studies, and cost-benefit analyses to support decision-making.

- **Data Analysis and Interpretation:**

- Leverage GenerativeAI and AI tools to analyze large datasets, extracting meaningful patterns and trends.
- Present data-driven insights to collaborators, aiding in the development of critical initiatives and operational efficiencies.

- **Project Management:**

- Lead and manage projects from inception to completion, ensuring timely delivery and adherence to quality standards.

- Coordinate with multi-functional teams, including IT, R&D, and operations, to implement solutions and drive project success.
- **Solution Development:**
  - Work with technical teams to design and implement AI-driven solutions that address business needs and improve research outcomes.
  - Ensure that developed solutions are scalable, sustainable, and aligned with industry best practices
- Communicate effectively with both technical and non-technical customers, translating complex technical concepts into actionable insights.
- Facilitate workshops, meetings, and presentations to engage customers and drive consensus.

## Minimum Requirements

- Bachelor's degree in Biomedical Sciences, Life Sciences, Computer Science, or a related field; Master's degree preferred.
- Experience as a Business Analyst in the biomedical research domain, with a focus on chemical, pre-clinical, and clinical research.
- Solid understanding of GenerativeAI and AI technologies, with practical experience in their application within the biomedical field.
- Proficiency in data analysis tools and techniques, with the ability to interpret complex datasets.
- Excellent project management skills, with a track record of optimally leading and delivering projects.
- Strong analytical and problem-solving abilities, with a keen attention to detail.
- Exceptional communication and interpersonal skills, with the ability to engage and influence customers at all levels.
- Familiarity with regulatory requirements and industry standards in the pharmaceutical and biomedical research sectors.
