Switzerland

Summary

A new and exciting opportunity has presented itself in CGT Stein. Join our team as a Process Expert, where you will providing front line technical and scientific expert support for all process-specific issues to ensure execution of processes on-time (business continuity); in compliance to cGMPs, SOPs and applicable guidelines and functional standards (e.g. HSE, NOSSCE) and to allow continuously improving in quality and productivity efficiency.

About the Role

Why join Cell & Gene Therapy?

In the Cell & Gene Therapy network we are operating on a daily basis (including weekend days) to deliver our life changing medicines the most rapidly to the patient.

Individualized CAR T therapy uses a patient's own immune system to fight certain types of cancers. A patient's T cells are extracted and reprogrammed outside of the body to recognize and fight cancer cells and other cells expressing a particular antigen.

Key Responsibilities:

- Provide front line expert support for all process-specific issues to production.
- Act as Subject Matter Expert (SME) for the product and process.
- Coordinate and ensure the completion of all production operations on time, in accordance with the documentation and in compliance with GMP, SSE and 5S rules.
- Ensure real time shop floor support as an expert on technical problems and ensuring that appropriate immediate corrective/remediation actions are implemented.
- Perform real time batches follow-up and batch records technical review.
- Ensure that all production documents are systematically up to date and that the production documents necessary for the validation / revalidation of processes are available.
- Execute validations when/where needed.
- Manage the preparation and execution of change over activities between campaigns by ensuring availability of equipment, consumables, raw materials, documentation and providing Change Over

training to technicians.

- Ensure timely treatment of deviations, complaints, OOE, OOS, and the implementation of effective CAPAs within agreed timelines.
- Lead thorough Root Cause Investigation process using investigation tools and methodology.

Minimum Requirements:

- Desired experience in GMP manufacturing process support role.
- Advanced English is a must.
- University degree in Science is desirable, Pharmacy or Chemical Engineering, Pharmaceutical Technology or equivalent job experience.
- Good scientific and technical (automation) understanding.
- Good working knowledge/understanding of manufacturing execution systems (MES, SAP, or relevant...).
- Good understanding or capacity to quickly understand production processes.
