Job ID
REQ-10025244
Oct 10, 2024
Czech Republic

Summary

Novartis is unable to offer relocation support for this role: please only apply if this location is accessible for you.

Within the Operations Data domain team this role is responsible for the design and implementation of Data Design and Governance processes including and Data Operating Model in reporting to the LDC Core Data Lead and in close collaboration with the Enterprise Data Owner (EDO)'s team and members of the Functional teams.

This role will focus establishing and developing the Novartis data capability in collaboration with the functions as well lead the implementation within LDC scope.

About the Role

Your key responsibilities:

- Role is accountable for overall global Material master data model design and improvement activities in alignment of the business goals and priorities in close collaboration with the respective Solution teams and business process owners.
- Develop roadmap for material master data model improvements and global adoption as part of the LDC delivery roadmap.
- Implement the data principles, data governance framework, data ownership and data operations.
- Ensure adoption of FAIR (Findable, Accessible, Interoperable, Reusable) data solutions across legacy landscape to produce FAIR data at the source for the entities they own.
- Responsible for gathering and implementing data requirements coming from Business Function (Domain Pillars in LDC projects), GPO, EDO and team and other dependent projects / programs.
- Facilitate cultural change by improving data literacy across the business through training, education and increasing data consumption.
- Proactively identify data issues and work with stakeholders to investigate and implement corrective measures and seek opportunities to continuously improve the quality and integrity of the data asset.
- Act as a point of reference and contact of all queries related to data objects of the respective data domain. Ensure that all data ideas, concepts, and features are validated with internal stakeholders from all levels of the business.
- Drives the transition into new ways of working defined by Enterprise Operating model per LDC Scope.
- Manage data quality definition for the assigned data within the Data team and is responsible for delivering agreed level of data quality as outcome of the data lifecycle management process

Commitment to Diversity & Inclusion: :

We are committed to building an outstanding, inclusive work environment and diverse teams representative of the patients and communities we serve.

What you'll bring to the role:

- At least 5 years' experience in regional or global role in material/product data related functional area such as Material master data management, Product master data management or Supply chain master data in cross-functional setting.
- Experience from SAP MDG, SAP S/4 HANA and materials management and related data concepts. Experience in SAP PLM / SAP EHS and/or Specification Management is an additional advantage.
- Proven track record for detailing data concepts for material master both from conceptual and operational governance perspective.
- Proven track record in driving discussions and facilitating cross-functional decision making in matrix organization.
- Experienced in collaborating with diverse project teams including functional solution teams, data governance teams and system configuration workstreams

Desirable requirements:

- Additional Project Management training, a certification/designation desirable
