

Medical Science Liaison

Job ID
REQ-10034000
Dec 19, 2024
Canada

Summary

Location: Montreal or Toronto, #LI-Remote

Novartis is unable to offer relocation support for this role: please only apply if this location is accessible for you.

About this National Role:

Are you ready to make a meaningful impact on patient outcomes? As a Medical Science Liaison (MSL) specializing in Radioligand Therapy (RLT) for neuroendocrine tumors (NETs), you will play a critical role in advancing innovative treatments. Collaborate with medical experts, healthcare professionals, and cross-functional teams to ensure cutting-edge scientific exchange and the seamless delivery of impactful insights. This dynamic national position offers an opportunity to shape strategies, build relationships, and drive patient-centric outcomes.

This role reports directly into the Medical Director, RLT, and will work hand in hand with the NETs cross-functional team.

About the Role

Key Responsibilities:

- **Foster Collaboration:** Partner with sales, marketing, market access, and clinical operations teams to ensure cohesive execution of strategies and objectives.
- **Engage Medical Experts:** Build strong, credible relationships with key opinion leaders (KOLs) and healthcare professionals (HCPs) to facilitate meaningful scientific discussions.
- **Deliver Medical Education:** Design and implement impactful educational programs that address regional and national needs.
- **Support Clinical Research:** Collaborate with investigators and clinical operations teams to optimize trial sites and enhance patient recruitment.
- **Share Insights:** Gather and report actionable field insights to refine strategies and identify opportunities for collaboration.
- **Lead Field Initiatives:** Drive pre- and post-launch activities, ensuring the successful introduction of RLT products.
- **Mentor and Lead:** Serve as a leader within the national MSL team, promoting best practices and a culture of collaboration.

Essential Requirements:

- Advanced degree in life sciences (MD, PharmD, PhD, or equivalent).
- Minimum of 2 years' experience in an MSL or similar field-based role.
- Exceptional communication skills, presentation and interpersonal skills, with the ability to simplify complex scientific concepts.
- Strategic thinker with a proven ability to integrate field insights into planning.
- Exceptional ability to thrive in a field-based, cross-functional environment with rapidly shifting priorities.
- Cross functional collaboration.
- Strong understanding of compliance and ethical guidelines for HCP interactions.
- Proficiency in English (French language skills are an asset).
- Flexibility for national travel (60% field engagement).

Desirable Requirements:

- Expertise in oncology, nuclear medicine, or radioligand therapy with a focus on NETs.

Why Novartis: Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you.
