

Sr. Spec. DDIT IES CIS – Private Cloud Engineering

Job ID
REQ-10035384
Jan 15, 2025
Czech Republic

Summary

We are seeking a motivated and experienced Sr. Specialist/Engineer to join our Novartis Core Infrastructure Services (CIS) / Engineering team. This role involves supporting continuous improvement in service delivery and operations or developing and maintaining a technology roadmap aligned with the Service Strategy for specific platforms. The successful candidate will perform the deployment, operational health, and lifecycle management of technology solutions, work on designing and deploying technology solutions, and provide L4 support during critical incidents. Additionally, they will automate service deployments and management to foster modern delivery flows such as DevOps and SRE, aiming to deliver efficiency, flexibility, and speed at the lowest aggregate cost.

About the Role

Responsibilities:

- Design and operation of Private Cloud and Infrastructure Services within the Private Cloud Engineering team.
- Provide expert infrastructure support for the Converged and Hyperconverged environment.
- Serve as a hardware consultant and virtualization technical expert for project teams, ensuring the development of new and existing solutions.
- Own individual projects to advance IT infrastructure initiatives.
- Offer support and mentoring to colleagues.
- Continuously improve processes, propose automations, and enhance cloud integration.
- Contribute to best practices and overall performance improvement.
- Negotiate technical infrastructure solutions with providers.
- Maintain stable compliance and security, measured by availability, performance, and capacity metrics.
- Ensure responsiveness and speed of recovery for critical incidents/issues.
- Promote automation-led, programmable infrastructure, and platform services.

Your experience:

- Extensive knowledge of virtualization platforms and containers, with a strong understanding of vendor-provided hardware solutions suitable for application owners.
- Proficient in OpenShift and SAN Storage technologies (Hitachi, Brocade).
- Skilled in IT infrastructure scripting, monitoring, and operations tools.
- Comprehensive understanding of hypervisor alternatives with hands-on experience.
- Familiar with GxP standards and capable of producing necessary documentation (AH, FS, DS, IQ, OQ).
- Fluent in English (written and verbal)
- Demonstrated experience in IT Infrastructure, Service Management, and Technology.

- Expertise in development/deployment, Project/Vendor/Risk Management.
- Strong integration knowledge and hands-on experience with AWS/Azure.
- Experience working with SAN/LAN network.
- Logical reasoning and analytical thinking capabilities.
- Hands-on experience with containers and their integration with virtualization products.
