

Medical Science Liaison – Radioligand Therapy

Job ID
REQ-10037855
Mar 13, 2025
Canada

Summary

Location: Western provinces, #LI-Remote

Novartis is unable to offer relocation support for this role: please only apply if this location is accessible for you.

About the Role:

Are you ready to make a meaningful impact on patient outcomes? As a Medical Science Liaison (MSL) specializing in Radioligand Therapy (RLT) for prostate cancer, you will play a critical role in advancing innovative treatments. Collaborate with medical experts, healthcare professionals, and cross-functional teams to ensure cutting-edge scientific exchange and the seamless delivery of impactful insights. This dynamic position offers an opportunity to shape strategies, build relationships, and drive patient-centric outcomes.

This field-based, customer-facing role reports directly into the RLT Medical Director and will work hand in hand with the Pluvicto cross-functional team. The territory covered will be West Canada.

About the Role

Key Responsibilities:

- **Engage Medical Experts:** Establish and cultivate relationships with key opinion leaders (KOLs), healthcare professionals (HCPs), and other relevant stakeholders in your territory to facilitate meaningful scientific discussions and implement the Medical Affairs plan.
- **Medical Expertise:** Demonstrate deep therapeutic expertise, understand territory/market dynamics, explore unmet medical needs, and deliver medical presentations to both external and internal stakeholders.
- **Deliver Medical Education:** Design and implement impactful educational programs that address regional and national needs.
- **Support Clinical Research:** Collaborate with investigators and clinical operations teams to optimize trial sites, enhance patient recruitment, identify research opportunities, and act as a point of contact for trial proposals.
- **Share Insights:** Gather and report actionable field insights to refine strategies and identify opportunities for collaboration.
- **Lead Field Initiatives:** Drive pre- and post-launch activities to ensure the successful introduction of RLT products. Identify and execute opportunities to collaborate with key stakeholders through regional consultative meetings, speaker programs, training sessions, publications, and collaborative research.
- **Foster Collaboration:** Ensure strong partnerships with cross-functional colleagues in areas such as market access, regulatory affairs, commercial operations, marketing, and sales.

What You Will Bring to the Role:

Essential Requirements:

- Advanced degree in life sciences (MD, PharmD, PhD, or equivalent) and minimum of 2 years' experience in an MSL or similar field-based role within the pharmaceutical industry.
- Excellent communication skills (oral and written), presentation abilities, and interpersonal skills, with the ability to simplify complex scientific concepts.
- Strategic thinker with a proven ability to integrate field insights into planning, strong business acumen, and problem-solving skills.
- Exceptional ability to thrive in a field-based, cross-functional environment with rapidly shifting priorities.
- Demonstrated ability to take ownership, set priorities, and achieve goals in a timely manner.
- Strong cross-functional collaboration skills.
- Deep understanding of compliance and ethical guidelines for HCP interactions.
- Flexibility to travel.

Desirable Requirements:

- Expertise in oncology, nuclear medicine, or radioligand therapy, with a focus on prostate cancer.
- Prior experience as an MSL.

Why Novartis: Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you. Collaborating, supporting and inspiring each other.

Combining to achieve breakthroughs that change patients' lives. Ready to create a brighter future together?
