

Procurement Manager - IT

Job ID
REQ-10039195
Feb 04, 2025
Czech Republic

Summary

The role of an IT Procurement Manager involves providing high-value procurement solutions to the business, supporting third-party vendor selection, vendor development, technology management, and performance measurement activities. The goal is to ensure best-in-class delivery of external services and products in the Data, Digital & IT Category, achieving year-on-year productivity improvements, cost savings, and process improvements in close collaboration with business & IT stakeholders

About the Role

Major Accountabilities:

- To lead proactive sourcing projects, specification definition and demand management with a focus in the Infrastructure and Security domains.
- Manage sub-category-specific supplier performance and support in driving innovation agenda on AI/Gen AI with emerging technology providers.
- Implement strategic goals from an overall stakeholder strategy/Ecosystem/Category management perspective.
- Planning, organizing and managing projects taking into account priorities, resources, budgets, issues and constraints to achieve desired results; defining clear project scope and objectives; utilizing software and tools to plan, track and report status.
- Executing the Source-to-Contract process including respective strategies, approaches and methods: Preparing and conducting fact-based negotiations. Adapting tactics from a broad portfolio of negotiation strategies to achieve results that support IT, business and Procurement objectives.
- Responsible to work with stakeholders to identify the most cost-effective ways to manage/influence demand to deliver business objectives
- ensure the right balance between business needs and Novartis' strategy.
- Provide input into the overall Category or sub-category strategy about segmentation and identification of key supplier relationships, and lead business planning activities and ensure these projects are staffed and executed on a timely basis in line with the targeted goals.
- Analyzing specifications for optimization. Linking specification to customer value, challenging specification confidently. Conveying messages clearly and convincing stakeholders.
- Achieving results by proactively building long-term, sustainable and effective relationships, understanding the stakeholder landscape and demonstrating intelligence across business structures and networks.

Minimum Requirements:

- > 5-10 years of experience in IT Procurement, preferably with a focus in the IT Infrastructure and Security domain

- Strong project management and stakeholder management experience
- Internal And External Customer Needs Analysis & Satisfaction Studies.
-
- Root Cause Analysis And Problem-Solving.
- Vendor Management.

Languages :

- Excellent spoken and written English
