China

Zusammenfassung

About the role: This is a pioneer role in the industry to drive the evidence excellence to improve patient access and outcomes in China. You will lead real world evidence (RWE) generation for Novartis strategic products 5 years prior to launch to address the varying evidence requirements of external stakeholders. You will implement innovative RWE programs to maximize the probability of success for the regulatory approval, reimbursement and adoption of Novartis medical innovations in line with the needs of patients and healthcare systems.

About the Role

Your key responsibilities:

Your responsibilities include, but are not limited to:

- Develop product or disease area RWE strategy and plan with the cross-functional team as critical component of local and global integrated evidence plan to be part of the Launch Plan IDP/ CDP and IPS
- Lead the development of new and innovative partnerships with external stakeholders across healthcare ecosystems to co-design and execute innovative study designs and implementation science that address preidentified evidence needs
- Map/license RWD sources and build research collaborations to increase the availability of fit-for-purpose RWD. Implement the RWE plan and execute RWE projects timely in close collaboration with cross-functional partners
- Communicate scientifically valid and relevant RWE to proactively address the varying evidence requirements of stakeholders e.g. Medical Societies, HCPs, Payers/HTA, Regulators, Patient Groups
- Identify and implement innovative RWE programs that can support to overcome key challenges in drug development using RWD or enable to provide meaningful RWE in support of regulatory decision making (e.g. label changes, new indications)
- Identify and implement innovative RWE programs to support payer decision making and maximize the probability of success for the reimbursement
- Co-design and execute implementation research to maximize adoption of Novartis medical innovations in line with the needs of patients and healthcare systems

What you'll bring to the role:

- With 3 + years conducting RWE research for pharmaceutical products in the pharma industry, contract research organization, or academic institute; or experience in a closely related discipline within the pharma industry (e.g., clinical research, statistics, epidemiology, pricing)
- Good understanding of Medical Affairs, Drug Development, Market Access/ HEOR, Safety or related disciplines to generate value evidence from retrospective and prospective studies.

- Experience in planning, creation, and analysis of real-world data, from both prospective and retrospective studies with a proven success record in this field
- Good understanding of available and emerging RWD data sources in China.
- Ability to work and lead (a cross-functional team) in a matrix environment 2+ years of relevant experience in Data Science
