## Zusammenfassung

Sandoz is going through an exciting and transformative period as a global leader and pioneering provider of sustainable Generic and Biosimilar medicines.

Now as an independently listed company, Sandoz aims to increase its strategic focus, operate with greater agility, set clearer business objectives, enhance shareholder returns, and strengthen its culture for us, the Sandoz associates. This is an exciting time in our history, and by creating a new and ambitious path, it will provide a unique opportunity for us all, both professionally and personally.

Join us as a Founder of our 'new' Sandoz!

## Job Purpose

- Point of contact for the Manufacturing Science & Technology (MS&T) team; co-leading the strategic alignment of the technology roadmap with the MS&T organization
- Establishes robust and agile strategic business partnering to ensure quality services are delivered to stakeholders as per agreed service descriptions to enable MS&T organization
- Drives and ensures that global and local demand for analytical product is captured from business and collaborates with other Technology functions to ensure quality services are delivered to stakeholders
- Acts as the Functional Lead for all data & analytics products required by the Manufacturing & Engineering stakeholders for both GxP (eg. Statistical Process Control) and non-GXP (eg. OEE, KPIs) use cases

## About the Role

### Major Accountabilities

- Establish strategic business partnering which focuses on delivering the IT quality services to support the ongoing business operations as well as the mid-term business strategy.
- Lead the definition and delivery of the MS&T Technology project and service portfolio
- Work closely with other IT domains to establish annual or periodic processes for portfolio, budgeting, business architecture, technology identification, technology sourcing, people and skills development and other IT support activities.
- Articulate the data strategy for MS&T, Manufacturing & Engineering in alignment with business strategy
  - Co-create the Product Family vision, business/customer capability roadmaps and product roadmaps in close partnership with the Business Product Owner
  - Advocate for the business and customer strategy within the IT organization to steer Platform and Product investments, prioritization and decision making

- Manages the interdependencies across product lines, looking for synergies and conflicts
- Owns all technical aspects of the product lifecycle in close partnership with the Business Product Manager
- Act as IT single point of accountability for delivering Product Roadmaps across the Product Family
- Responsible to manage the vendors necessary to successfully utilizing the products throughout their lifecycles
- Manages the solutions related budget for Manufacturing Analytical products (project and operations)
- Ensure 1st class experience for the associates in the team by creating an inclusive, inspired environment and upskilling and developing people.
- Fosters a digital culture which promotes speed, agility, customer focus, strong business engagement in Technology
- Serves as point of escalation, review and approval for key issues and decisions

### **Key Performance Indicators**

- Successful delivery and operations of standardized data & analytics solutions for the Manufacturing business partners in alignment with business strategy and global technology Strategy
- KPIs which are relevant for customer satisfaction are clearly defined, constantly measured, and met
- Meeting yearly budget target for TechOps projects and operations

### **Ideal Background**

#### **Education:**

- Degree in computer science, IT related field or technical discipline; Master's degree desirable

#### **Languages:**

- Advanced proficiency in English (written and spoken)

#### **Experience and Skills:**

- > 8 years' experience working in an IT environment
- > 5 years' experience in working in Manufacturing data & analytics in local & global roles
- > 3 years' experience as people manager
- Advanced experience in Stakeholder management at country / regional / global up to Leadership level
- Excellent knowledge in building and running technology solutions in regulated industries
- Advanced knowledge of IT Strategy & Planning
- Extensive project management and change management experience
- Track record in delivering global solutions at scale
- Advanced knowledge in vendor management
- Advanced knowledge of Lean / 6 Sigma, Design Thinking, Agile methodology
- Working experience within the pharmaceutical industry (best in multi-national with global experience)
- Relationship Management, Interactions with senior management
- Leveraging digital technology / big data for business and customer needs
- Emerging and latest market trends
- Managing challenges, Proactive thinking

#### **You'll receive:**

Breakdown of benefits received in this role. Include flexible working, learning and development opportunities as well.

## Why Sandoz?
