Zusammenfassung

In TRD Biologics & CGT, more than 1,000 associates spread across 5 locations are fully committed to deliver on our evolving pipeline of transformative treatments. We develop Biologics & CGT drug substance and drug products from candidate selection up to launch and drive competitive advantage through agility, innovation, and scale to best serve our portfolio, partners and patients. We are looking for an Expert Science & Technology in Analytical Development. We seek candidates who are accountable and driven by clear objectives, appreciated for their emphasis on collaboration and teamwork, and eager to embrace new challenges, thus broadening their knowledge and skillset. The candidate should design, plan, perform, interpret and report results of scientific experiments for the development and timely delivery of drug molecules, processes and procedures. Join us as we shape the future of drug development through analytical expertise. You are kindly encouraged to submit your application by 31 August 2024.

About the Role

Major accountabilities:

- Independently plan, organize, perform and document scientific experiments under minimal supervision; handle several activities at a time; take over responsibility for and utilize special tools /equipment or specialized facilities as an expert; schedule and perform maintenance and qualification of instruments / equipment. Proactively identify conflict situations and contribute to solutions. Work according to appropriate standards for quality, ethics, health, safety, environment protection, and information security; lead initiatives to ensure continuous improvement. Documentation of raw data, evaluate and interpret results; propose and actively support the design of next experiments.
- Review and verify raw data generated by others; approval of tests / experiments performed by others. Write protocols, scientific reports or lab procedures based on templates or SOPs under minimal supervision. Develop new methods or optimize existing methods/processes; contribute to development and implementation of new technologies. Perform information and literature searches under minimal guidance.
- Actively foster knowledge exchange.
- Train and coach associate scientists, technicians, temporary employees and employees under training / education.
- Establish innovative solutions for verification and control of critical quality attributes, critical material attributes or critical process parameter in cooperation with other colleagues.
- Generate scientific documents to hand over to internal and / or external partners (e.g., MST, TechOps, authorities, external companies) and support generation of international registration documents under minimal supervision.
- If assigned this task, maintenance of infrastructure / equipment and required investments (e.g. system ownership). Generate lab procedures or SOP's, generate protocols and reports. Report and present scientific /technical results internally and contribute to publications, presentations and patents.

Requirements:

- University degree (MSc) in pharmacy, pharmaceutical technology, chemistry, engineering sciences, or another relevant scientific field with at least 1 year of experiences in a comparable role
- Basic knowledge of analytical methods and techniques including chromatography, spectroscopy, and other relevant physico-chemical methods.
- Familiarity with automating laboratory processes and instrument control software to enhance efficiency.
- Experience in Experiments Design and Technical Writing.
- Excellent problem-solving skills and the ability to troubleshoot instrumentations and analytical methods.
