About the Role

99 million. That's how many lives our products touched in 2023. And while we're proud of that, in this world of digital and technological transformation, we must also ask ourselves this: how can we continue to improve and extend even more people's lives?

Your key responsibilities:

Your responsibilities include, but are not limited to:

- Initiates and/or supports projects for the purchase of production equipment and implements them in accordance with the objectives, methodology and planned costs of the projects; Prepares the user's requirements and transmits them to the suppliers, including the technical details specific to the products and production lines, adapting the supplier's solutions to the specific manufacturing environment.
- Prepares CARs (budget requests) for investment and continuous improvement projects, respectively energy efficiency; Collaborates with external suppliers in order to establish the specific technical details of the projects from the functions point of view and their integration into the factory's systems and infrastructure;
- Coordinates the qualification of systems for production and technical departments; Ensure continuous improvement and management of existing systems and applications;
- Collect requests for new requirements, plans and implements system changes and applications updates involving other relevant departments (MS&T, Production, Quality, IT); Collaborates with suppliers to ensure the internal requirements of the departments are met regarding the current applications/production systems; Coordinates continuous quality improvements to ensure compliance with internal or external requirements;
- Prepares/Approves the deviations and exceptions from the change and quality plan for the projects they coordinate; Prepares and implements specific procedures for technical and production systems, computerized equipment systems and ensures the personnel who use them are properly trained regarding the provisions of those procedures;
- Participate in GMP, workplace-specific, HSE and P&O trainings; Participate in the Evolve performance management process based on objectives, frequent check-ins, recognition and rewards; Keeps the confidentiality of the data and information to which it has access to and which are classified as restricted or confidential;
- Responsible for the alignment with the standards imposed by the Novartis group regarding IT/OT and Automation applications; Comply with the GMP, SSM, SU and environmental protection rules, respectively the workplace-specific procedures in force; Responsible for product quality and GxP compliance, including appropriate reporting to higher hierarchical levels of any issues related to product quality, GxP incidents or non-conformities;
- Is responsible for reporting to the management level any activities that have the potential to compromise the functioning of the quality system or the quality of the product, in accordance with the Quality Directive

regarding Escalation from the Novartis Quality Manual; Is responsible for the accuracy and completeness of the completed documentation;

- Desired: Computer Design CAD/CAM
- Experience: 5 years in project management, mechanical design, computerized systems, automation, electronics, pharmaceuticals manufacturing
- Language: English and Romanian

Why consider Novartis?

769 million lives were touched by Novartis medicines in 2020, and while we're proud of this, we know there is so much more we could do to help improve and extend people's lives.

We believe new insights, perspectives and ground-breaking solutions can be found at the intersection of medical science and digital innovation. That a diverse, equitable and inclusive environment inspires new ways of working.

We believe our potential can thrive and grow in an unbossed culture underpinned by integrity, curiosity and flexibility. And we can reinvent what's possible, when we collaborate with courage to aggressively and ambitiously tackle the world's toughest medical challenges. Because the greatest risk in life, is the risk of never trying!

We offer a market-competitive base salary in line with your qualification, experience, and individual competencies. Additionally, we offer an attractive incentive program, learning & development options, and worldwide career opportunities within the Novartis group.

Novartis are an equal opportunities employer and welcome applications from all suitably qualified persons.
