About the Role

Position Title: Senior Analyst Business Analytics

Location – Hyd-india #LI Hybrid

About the Role:

20+ brands catering to 50+ disease areas! The team of Novartis specialists within Insights & Analytics are on a data and digital transformation journey, using analytics to generate impactful insights for Novartis medicines impacting more than 500 million patients worldwide.

Your responsibilities include but not are limited to:

- Solid understanding of multiple datasets (e.g. LAAD, Xponent, hard-working) and managing and coordinating data sets from databases to find patterns and trends.
- Redefining these complex and granular data into actionable insights.
- Responsible for standard and ad-hoc extracts/reports across multiple primary and secondary data sources.
- Responsible for tracking ongoing outcomes reports and manage priorities for upcoming reports.
- Sharing findings with partners with reports and presentations on a timely basis
- Putting together specifications to extract/transform data into required formats for different analytical elements using programming languages like SQL or other data processing tools.
- Build the foundation for more sophisticated approaches to APLD analysis and advanced analytics wherever it is required and beneficial.
- Establish and maintain positive relationships with key functional partners.

Essential Requirements:

- Ability to work independently and as an integral member of the team and Attention to detail and quality focused, good interpersonal and communication skills, influence, negotiation and tact skills, innovative, and collaborative behaviors and “can-do” orientation.
- Curiosity and strong analytical thinking, verbal and written communication skills and exposure to working in multi-functional/cultural environment.
- Good communication and interpersonal skills. Conceptual, analytical & tactical thinking, strategic thought process
- Ability to multi-task, work in a demanding distributed team environment, work under tight deadlines. Develop and maintain strong individual performance.
- Technical abilities: Excel, SQL or Dataiku, and PowerPoint is vital. Knowledge of statistical modeling or ML is a plus.

Desirable Requirements:

- Masters or Bachelor’s in STEM
- At least 3+ years of experience in data modeling and reporting solutions development and hands-on experience of APLD and US national and subnational datasets and ability to lead teams functionally.
