Resumen

+ 1000! In TRD Biologics & CGT, more than 1,000 associates spread across 5 locations are fully committed to deliver on our evolving pipeline of transformative treatments. We develop Biologics & CGT drug substance and drug products from candidate selection up to launch and drive competitive advantage through agility, innovation, and scale to best serve our portfolio, partners and patients. We are looking for a Senior Expert Science & Technology in Downstream Process Development.

About the Role

Key responsibilities:

- Independent planning, designing, organizing, performing, and documenting scientific experiments/testing in development and clinical manufacturing.
- Preparing protocols, reports, laboratory procedures and SOPs, development manuals and similar technical documentation required for clinical trial application and/or marketing authorization dossier submission.
- Recording, management and evaluation of raw data/analyses/results, forming of sound scientific conclusions and providing suitable follow-up activities.
- Independent development/optimization of DSP processes (DQP/GMP environment), independent process transfers to manufacturing (GMP).
- Independent implementation of new technologies, equipment.
- Searching/utilizing the knowledge from scientific and technical literature, presenting at internal/external conferences and/or network meetings.
- Leading/actively contributing to project functional teams at locally and globally.
- Prompt communication of achievements, risks, issues in all areas and active contribution to root cause investigations and trouble shootings. Active knowledge transfer to junior associates and cross-functional partners
- Identifying and resolving complex problems.
- Management of advanced/complex DSP equipment, including purchase, maintenance and qualification

activities

- Ensuring compliance to company policies, regulatory requirements and HSE requirements. Supporting regulatory and Novartis internal audits.
- Ensuring proactive compliance and continuous improvement.
- Responsibility for any other tasks specified in annual objectives, KPIs, per instruction by operational manager or by a special assignment.

Role Requirements:

- University degree (MSc) or PhD in chemical engineering, pharmacy, pharmaceutical technology, chemistry, or another relevant scientific field.
- Minimum 5 years of experiences in the field of biologics/small molecules development/manufacturing.
- Active knowledge of English language required (oral & written).
- We are looking for responsible, objective-driven candidates who value collaboration, teamwork and are open to new challenges and expanding their knowledge and expertise.

We offer **permanent contract with a probationary period of 6 months**, work in a dynamic environment, collaboration with various teams, and knowledge and experience exchange within the global Novartis system. You are kindly invited to submit your application, including CV, by **August 14, 2024**.
