Resumen

We are looking for a motivated recent graduate with a master's degree to join our QC Cell & Gene therapy team in our production site in Stein for 1 year for an exciting lab automation project.

About the Role

Why join Cell & Gene Therapy?

In the Cell & Gene Therapy network we are operating on a daily basis (including weekend days) to deliver our lifechanging medicines the most rapidly to the patient. We are helped do this by facilities and infrastructure that are top class, but also by an environment that is open-minded, and one which supports people to develop with mentoring, training and the opportunity to experience different disciplines. We are looking for a motivated recent graduate with a master's degree to join us in our production site in Stein for 1 year for an exciting lab automation project.

Major accountabilities:

- Support the laboratory in the implementation of new techniques/technologies and lab automation project
- Support the preparation of equipment qualification plan and writing related SOP
- Interact with Engineering to define the adequate maintenance plan
- Execute the equipment performance qualification

What you'll bring to the role:

- Master degree in bio-chemistry, biology or pharmacy (completed in the past ca. 12 months) with strong experience in biological assays experience (Flow Cytometry, ELISA ...)
- Laboratory experience
- Collaboration; result-oriented
- Breakthrough Analysis; Being Resilient; Operational Excellence, Statistical analyses;
- MS Office applications and other standard IT applications supporting Quality activities

Desirable:

- Previous experience working in a biological laboratory environment in the pharmaceutical industry (quality assurance, production).

Languages :

- English (oral and written)
- German optional
