About the Role

Manager - Compliance Analytics Visualization Design

Location – Hyderabad #LI Hybrid

About the Role:

Individually is pivotal for developing and designing data products including insights dashboards, from user interface design to data visualization support for Novartis Business Stakeholders. Individuals applying should have capabilities to create interactive prototypes and mockups. Maintain and evolve existing design system, build new elements, icons etc. integrate internal and external data with data science expertise to optimize risk management, compliance, and overall departmental transformation, ensuring the delivery of clear, user-friendly, and insightful data presentations

Key Responsibilities:

- Leading the graphic design and data visualization work, working closely with business stakeholders, analytics team members and design experts
- Driving innovation in data visualization and design, utilizing the latest tools and technologies, and applying design thinking principles to create intuitive and engaging user experiences.
- Providing high-fidelity designs and Figma prototype for an interface to be implemented in the Power BI /web mash-ups.
- Accountable for user-centric and aesthetic presentation of data insights through various data products such as dashboards and apps.

- Act as the expert advisor on UX/UI design and provide guidance and recommendations to optimize user interactions and engagement
- Develop feature roadmaps and prioritize design enhancements based on user feedback and business objectives.
- Create prototypes, mockups, and demonstrations of new platform features and elements to effectively communicate design concepts and gather feedback. Drive continuous improvement through user research and usability testing, gathering feedback and insights from users to refine and enhance the UX/UI design strategies and ensure industry-leading experience
- Collaborating with analytics team members for specialized design solutions, ensuring alignment with company branding and compliance standards.
- Driving innovation in data visualization and design, utilizing the latest tools and technologies, and applying design thinking principles to create intuitive and engaging user experiences.

Commitment to Diversity & Inclusion: :

We are committed to building an outstanding, inclusive work environment and diverse teams representative of the patients and communities we serve.

Essential Requirements:

- Bachelor's degree in graphic design, communications, marketing or digital media / An Advanced Degree in Design, Graphic Design, Data Visualization, or a related field with a focus on empirical/data visualization is preferred.
- 7-10 years of experience in data visualization and graphic design.
- UX/UI design in a corporate or agency setting.
- UX tools including Figma, Power BI, Adobe XD and Sketch.
- Collaboration with development teams to create designs for data products.
- Design enhancements to improve existing data products.
- Corporate brand awareness and application to digital design systems.

Desirable Requirements:

- Experience working in the pharmaceutical industry, or any other heavily regulated industry and risk focused functions is advantageous.
- Knowledge and appetite for the data analytics is a big plus.
