Resumen

Novartis is unable to offer relocation support for this role: please only apply if this location is accessible for you. #LI-Hybrid This is a key role responsible for overseeing network infrastructure design, implementation, and management in the Pharma and Healthcare sector. This position ensures seamless integration, performance, and security of IT/OT networks in regulated environments. With Novartis's global network undergoing a significant transformation aligned with business goals and technology advancements, we are actively seeking an experienced Associate Director for Infrastructure Services- Lab Network with deep expertise in OT (Operational technology) networks and a strong engineering background.

About the Role

Your key responsibilities:

Your responsibilities include, but are not limited to:

- Responsible for strategizing, designing, and establishing specifications, standards, and reference architecture for secure, high-speed networks in Wired, Wireless, and LAN Segmentation for the OT environment
- Understand and translate enterprise needs into implementable technology solutions to enable long-term success and future-oriented design ensuring they meet regulatory compliance and performance standards.
- Develop network roadmaps and strategies, working with various other domain architects to align technology and service roadmaps for the manufacturing and laboratory network.
- Drive new technology/product/solution evaluations, provide leadership in the identification of specific technology standards for secure and scalable production and laboratory networks.
- Lead product/solution Proof of Concept with other domain architects/engineers etc.
- Take ownership of upholding Security and Compliance policies and procedures within the enterprise's solution architecture scope.
- Observing day to day operations closely to understand the challenges and ensure stability of research laboratory and production environment ensuring minimal downtime and high availability.
- Closely working with business and local IT/OT team to be aligned with business need and ensure stable operations.

- Lead continuous improvement initiatives to optimize network performance, enhance security, and ensure compliance

Commitment to Diversity & Inclusion: :

We are committed to building an outstanding, inclusive work environment and diverse teams representative of the patients and communities we serve.

What you'll bring to the role:

- 7-10 years of experience in IT/OT networking with a focus on industrial and lab/manufacturing environments within the pharmaceutical and healthcare industries, largely in an engineering and architect role.
- 4 years of experience in the areas of designing and solutioning wired, wireless networks and security controls for OT environment.
- Strong exposure and experience with Palo Alto, Cisco and other advance security stacks.
- Deep understanding of network & security concepts and familiar with industrial control systems (ICS), SCADA, lab automation systems and PLCs (Programmable Logic Controllers) used in lab and manufacturing settings

Desirable requirements:

- Bachelor's degree in computer science, Information Technology, or a related field.
- Cisco Certified Network Professional (CCNP) or higher. Certified Information Systems Security Professional (CISSP) or higher. Certified Automation Professional (CAP)
