Resumen

Location: Durham, NC This senior role will support and drive business initiatives that pertain to the Cell and Gene Therapy Organization in our Process Development units. In doing so, he/she will develop tools to track and report progress in key milestones while interfacing with internal and external stakeholders. In scope are global initiatives, business processes, site operations, budgetary requirements, and assigned units people culture initiatives/strategies. This role will serve as a strategic partner and advisor for their representative teams tasked with developing timelines and resource planning from early development to commercial launch. The ideal candidate will have in-depth knowledge of business processes and general CMC development. This role will report to Head of Gene Therapy, Process Development and be a contributing member to several cross-functional committees with visibility to the entire cell and gene therapy portfolio.

About the Role

Your Key Responsibilities:

- Drive activities related to business strategies and operations, including project planning, execution, and implementation.
- Translate business priorities into operational deliverables to achieve department and functional goals. Drive and track business performance metrics with monthly reporting.
- Work cross-functionally to identify opportunities to build new processes and systems, streamline existing ones, and execute implementation plans.
- This candidate will be responsible for analyzing business cases related to operations efficiency, associated costs, and risks/benefits.
- Support CMC portfolio planning, including resource planning and capacity assessments.
- Support internal and external collaborations and partnerships driven by technical engagement.
- Champion continuous improvement initiatives, project scoping and chartering, and change management within unit to improve the efficiency and effectiveness of the organization.
- Manage department meetings and governance forums, including preparation of meeting agendas, distribution of minutes, and tracking outcomes and deliverables.

Role Requirements:

- Bachelor's Degree in Finance, Business, Biotech, Chemical Engineering, Biology, or Chemistry or related field
- Masters, PhD, or MBA will be an advantage
- 5+ years of experience in business management, CMC development, or Biotech Operations within the pharmaceutical or biotech industries,
- Strong Business Acumen

- Comfortable working with ambiguity. This role will have led strategic planning in a fast-paced organization and have a record of success bringing structure to environments with change and uncertainty.
- Demonstrated competency in development and analysis of long-term strategic plans
- Excellent facilitation, presentation, communication skills. Comfortable navigating/influencing all levels / groups of functional leaders through complex agendas toward the right discussion outcomes.
- Ability to objectively analyze options, risks, trade-offs and have good problem-solving approach
- Applies technical expertise in business operations and contributes to the development of new concepts, techniques, and standards
- Highly collaborative with outstanding communication and relationship management skills, high emotional intelligence
