

# Assoc. Director, Technical Solution Delivery, Global Clinical Operations

Job ID  
REQ-10018830  
Ago 13, 2024  
España

## Resumen

Location: Barcelona  
#LI-Hybrid

In this role you will create the detailed Data Digital & IT (DDIT) solution/service design, based on functional specifications to meet quality and performance requirements and technical constraints. You will be responsible for detailed design, development, code review and delivery of system solutions

## About the Role

### Key Responsibilities:

- Responsible for detailed design, development and delivery of system solutions for a specific business or technology area in alignment defined solution architecture and create the detailed process designs necessary to operate the software/service on a day to day basis
- Take accountability for technical delivery of projects/use cases for a specific business area
- Ensure that detailed designs adhere to solution architecture design (i.e. high level conceptual design)
- Ensure designs produced adhere to architectural roadmap, support the development, execution and operations of software/service and are traceable to functional as well as non-functional requirements in functional specification.
- Provide comprehensive and authoritative technical guidance and ownership on a wide range of aspects within the area of project execution to influence internal and/or external stakeholders. Ensure the overall user experience is considered when designing new solutions and services
- Take accountability to ensure adherence with Security and Compliance policies and procedures within Service Delivery scope. Individual contributor with responsibility for high to medium sized complexity of projects

### Role Requirements

- Bachelor's degree in Computer Science, Computer Engineering or related technical discipline or equivalent experience demonstrated experience
- 12+ years of experience with expert understanding and proven track record in analyzing business processes, architecting, designing, developing and integrating complex, cross-divisional end to end technical solutions with large data volumes.

- Should have a background in programming and solution design. Exposure to a wide range of technologies is preferred. Experience in integrating or implementing Commercial off-the-shelf products
- Excellent verbal and written communication skills with ability to interact with senior IT and business stakeholders. Ability to effectively convey complex technical concepts to a non-technical audience.
- Self-starter with ability to work autonomously in a highly matrixed and multi-cultural environment, taking full ownership of deliverables.
- Experience in highly regulated environments, ideally in the Pharma industry, including on Computer System Validation. Experience working in Agile Scrum teams
