

Medical Scientific Liaison

Job ID
REQ-10023872
Sep 26, 2024
Turquía

Resumen

- Serve as an ambassador to the medical/ scientific community and responsible for establishing, developing and partnering with HCPs
- To engage, collaborate and align with a broad range of external stakeholders to co-create value, address identified patient needs and ultimately change the practice of medicine for better patient access and outcomes
- To ensure the appropriate dissemination of clinical and scientific information regarding Novartis' compounds in a timely, ethical and stakeholder-focused manner
- To pair key stakeholders' scientific educational and research needs with available Novartis resources and provide the latest emerging data in response to unsolicited medical enquiries, as appropriate.
- Ensure tactical implementation of objectives and thus contribute to be a best-in-class Field Medical organization

About the Role

Major accountabilities:

Medical Expert Engagement

- In collaboration with the cross-functional team, lead appropriate identification, mapping, segmentation and engagement of Medical Experts
- Upon unsolicited requests for information from HCPs, present data on Novartis products, this may include internally Globally approved information on compounds in development with no approved indications.
- Involve HCPs when a need is identified to provide support/ advice/ participate in specific medical and scientific activities e.g. advisory boards, education of health care providers, publications, etc.
- Develop and execute Medical External Engagement Plans (MEEP) to effectively prioritize and strategically engage MEs aligned with country strategy.

Scientific Research Support

- Provide scientific education and share information about Novartis clinical research program to identify potential study sites and support study accrual for key trials as appropriate.
- Provide feasibility and research site recommendation for Novartis sponsored clinical trials.

- Upon investigator request, liaise between potential researcher and the Company on IIT submission process or requests for research grade substance (Material Transfer Agreements) to support independent clinical/ preclinical research.

Scientific Exchange/ Insights

- To engage in scientific discussions related to Novartis compounds/pipeline with Medical Experts to support the exchange of scientific information and understanding of new scientific principles, trends and scientific debates (e.g. AdBoards, scientific meetings, regular discussions).
- Collect, analyze and report insights from HCPs to inform and shape medical strategy.
- Provide scientific and educational information to HCPs on specific patient critical issues.
- Build relationships with relevant medical societies, associations and health care institutions.

Scientific Projects

- Implement scientific projects according to global, regional or local medical strategies. Examples may include, but not limited to, epidemiology projects, registries, preclinical or translational research, as well as multi-disciplinary projects involving education and collaboration of multiple functions in the medical community to improve patient diagnosis and treatment.

Internal Novartis Contributions

- Provide expert disease area and product training to Novartis field colleagues (e.g. new MSLs, sales reps, CRAs) and support coaching and mentoring of MSLs as assigned by manager.
- Proactively contribute to shape the Product Strategy plan proactively providing external stakeholders' insights and contribute to the design and execution and the Medical Affairs strategy and plan. May lead specific areas e.g. stakeholder identification and management plans.
- Lead or participate in projects and / or initiatives as assigned by manager.
- Liaise with relevant internal teams (i.e. KAM, HE&OR, Patient Access) to provide up-to-date medical support to external groups e.g. to provide scientific information in the discussion of product inclusion in medical guidelines, formularies.

Integrity and Compliance

- Ensure relevant processes and compliance procedures e.g. Medical Interaction Global Guideline (GGLD-8162500) are always followed.
- Work within Integrity and Compliance policies and ensures those around him / her do the same.
- Work to ensure a diverse and inclusive environment free from all forms of discrimination and harassment.
- Ensure adequate reporting of adverse events / technical complaint / compliance issue in accordance with company procedures
