

Senior Principal Data Engineer

Job ID
REQ-10027152
Ene 23, 2025
India

Resumen

Architects and builds data intensive products, platforms, and leveraging data engineering best practices and strength in data ingestion, extraction, and highly scalable data management systems

About the Role

Major accountabilities:

- Build and deploy cloud-based production systems for scientists who have high expectations for quality, turnaround, performance and reliability.
- Create and promote reusable and interoperable systems and the efficient reuse of software and data between disparate systems within BR.
- Create or enhance a reusable, reliable, observable cloud platform for ingesting a large number of heterogeneous data sets from numerous disparate sources, including all of the major cloud providers
- Integrate professional data engineering practices as appropriate into the front lines of BR science groups and inspire others within the engineering community to emulate these practices.
- Ensure adherence to Novartis global Information Security and Quality standards and policies for all products/services.
- If applicable, ensure Regulatory Compliance (e.g. GLP & GCP) standards and policies for GxP products/services.

Minimum Requirements:

Work Experience:

- Significant experience building commercial-quality cloud-based solutions at scale, and leading teams in the design and implementation of creative solutions to difficult computational problems
- Interest in intersection between the life sciences, computer science, data engineering, AI
- Experience building and maintaining secure, scalable, observable infrastructure supporting a large scope of services in Amazon AWS
- Similar experience with Microsoft Azure and Google Cloud Platform a plus
- Experience following standard SDLC practices, including build platforms (Jenkins) and source repositories (Git) , Docker , Terraform, CloudWatch, Grafana , Kafka (Amazon MSK) and other event-based streaming services
- Some programming experience: Linux bash/shell scripting, Javascript/Typescript , Python
- Basic statistics / numeral literacy
- Basic understanding of machine learning and generative artificial intelligence and related technologies
- Excellent English-language communication skills
- Excellent interpersonal skills with the ability to create and influence initiatives in a matrix environment that

lead to new levels of organizational impact

- Able to debug independently
- Able to work independently while consulting and informing the broader team

Education & Qualifications:

- Advanced degree in Computer Science, Informatics or similar, or equivalent practical experience

Commitment to Diversity and Inclusion:

Novartis is committed to building an outstanding, inclusive work environment and diverse teams' representative of the patients and communities we serve.
