

# Director, Analytics & AI

Job ID  
REQ-10033766  
Dic 17, 2024  
Suiza

## Resumen

This role is part of the commercial Data and Analytics team at Novartis. The Director – Analytics & AI will understand complex and critical business problems from various stakeholders and business functions, formulate an integrated analytical approach to mine data sources, and employ statistical methods, machine learning algorithms, and AI to discover actionable insights and automate processes for reducing effort and time for repeated use.

## About the Role

### Major Accountabilities:

- Deliver data science pipelines, models, and ensure the quality of AI outcomes, with a focus on AI call planning.
- Develop and manage AI/ML-based Next Best Action (NBA) models.
- Communicate and collaborate effectively with senior stakeholders across Novartis teams, driving strategic priorities at the enterprise level in a matrix environment.
- Possess an in-depth understanding of the drug development life cycle and the commercial aspects of the pharmaceutical business.
- Stay updated with existing and emerging AI/ML tools and technologies and have a proven track record of implementing them at an enterprise level.
- Build statistical, econometric, and ML algorithms (e.g., random forest, GBM, clustering techniques), and have an advanced understanding of optimization techniques.
- Translate business requirements into problem statements and drive hypothesis generation to identify the right data science problems to be solved.
- Deliver enterprise-level scalable solutions and have proven capability in building and developing data science-driven software products, along with an understanding of software lifecycle management and agile product delivery.
- Exhibit excellent written and verbal communication, business analysis, and consultancy skill.

### Essential Requirements:

- Master's or Ph.D. in Computer Science, Bioinformatics, Epidemiology, Statistics, Decision Science, Quantitative Research, Econometrics, or Computational Biology, along with a post-graduate degree in Business Management.
- Robust understanding of the pharmaceutical domain and pharma product life cycle.
- 12+ years of relevant experience in developing data science techniques and AI/ML product development, with an understanding of prevalent technology.

## Desirable Requirements:

- Experience in building statistical, econometric, and ML algorithms (e.g., random forest, GBM, clustering techniques).
- Advanced understanding of optimization techniques.
- Ability to translate business requirements into problem statements and drive hypothesis generation to identify the right data science problems to be solved.
- Proven capability in building and developing data science-driven software products and understanding of software lifecycle management and agile product delivery.
- Excellent written and verbal communication, business analysis, and consultancy skills.

## Location:

This role can be based in Basel, Switzerland. Novartis is unable to offer relocation support for this role: please only apply if this location is accessible for you.

## Benefits:

Read our handbook to learn about all the ways we'll help you thrive personally and professionally: [Novartis Life Handbook](#)

## Commitment to Diversity & Inclusion:

Novartis is committed to building an outstanding, inclusive work environment and diverse teams representative of the patients and communities we serve.

## Accessibility and accommodation:

Novartis is committed to working with and providing reasonable accommodation to all individuals. If, because of a medical condition or disability, you need a reasonable accommodation for any part of the recruitment process, or in order to receive more detailed information about the essential functions of a position, please send an e-mail to [inclusion.switzerland@novartis.com](mailto:inclusion.switzerland@novartis.com) and let us know the nature of your request and your contact information. Please include the job requisition number in your message.
