Résumé

This position requires a strategic problem solver who can analyze complex business needs, leverage Generative AI to derive actionable insights, and support the implementation of AI-driven solutions.

About the Role

Your responsibilities include but are not limited to

- **Domain Expertise:**
 - Apply in-depth knowledge of life sciences, including drug discovery, development, and clinical trials, to support AI-driven initiatives.
 - Stay abreast of the latest advancements in Generative AI and their potential applications in the life sciences industry.
- **Business Analysis:**
 - Collaborate with customers to gather, document, and analyze business requirements, ensuring alignment with organizational objectives.
 - Conduct thorough analyses of business processes and workflows, finding opportunities for AI-driven improvements and efficiencies.
 - Develop business cases, feasibility studies, and cost-benefit analyses to support AI projects.
- **Generative AI Application:**
 - Apply Generative AI technologies to analyze large and complex datasets, identifying patterns, trends, and insights.
 - Work with data scientists and AI engineers to develop and deploy AI models that address business needs in the life sciences domain.
 - Ensure AI solutions are interpretable, actionable, and integrated into existing workflows.
- **Customer Engagement:**
 - Communicate complex AI concepts and findings to both technical and non-technical customers, ensuring understanding and buy-in.
 - Facilitate workshops, meetings, and presentations to engage customers and drive consensus on AI initiatives.
- **Regulatory & Ethical Compliance:**
 - Ensure that AI solutions align with regulatory requirements and ethical standards relevant to the life sciences industry.
 - Monitor and address potential risks associated with the deployment of AI technologies.

- Bachelor's degree or equivalent experience in Biomedical Sciences, Life Sciences, Computer Science, or a related field; Master's degree preferred.
- Experience as a Business Analyst in the biomedical research domain, with a focus on chemical, pre-clinical, and clinical research.
- Solid understanding of GenerativeAI and AI technologies, with practical experience in their application within the biomedical field.
- Proficiency in data analysis tools and techniques, with the ability to interpret complex datasets.
- Excellent project management skills, with a track record of successfully leading and delivering projects.
- Strong analytical and problem-solving abilities, with a keen attention to detail.
- Exceptional communication and interpersonal skills, with the ability to engage and influence customers at all levels.
- Familiarity with regulatory requirements and industry standards in the pharmaceutical and biomedical research sectors.
