

# Manager - Advanced Patient Analytics

Job ID

REQ-10015187

Apr 12, 2024

India

## Résumé

The role involves exploring, developing, implementing, and scaling analytical solutions to meet customer needs, while co-creating with stakeholders to build strong partnerships. The candidate must possess a data storytelling mindset, strong project management skills, and the ability to independently handle projects. They should have techno-functional expertise, including using AI tools like chatbots (prompt engineering) and performing statistical analyses. Collaboration with cross-functional teams to drive BI best practices, enhance reporting/data visualization, and integrate industry-leading practices is essential. An agile mindset to continuously improve solutions and provide effective, timely responses to ad hoc requests is required.

## About the Role

### Key responsibilities:

- Explore, develop, implement, and scale analytical solutions that address customer needs. **Co-create** with key stakeholders to build partnerships & collaborations.
- Strong **data storytelling mindset** with experience in handling projects independently
- Strong **Project Management** skills for leading the delivery of multiple projects, ensuring delivery of efficient and high-quality deliverables. Develop and coordinate project plans across the requirement gathering, design, development, testing and deployment stages of a project to support the successful delivery of dashboards
- Should have techno functional capabilities and should know how to use AI tools like a chatbot and would be required to do **gap analyses and share inferences from the same** in order to help make the AI tools better
- Functionally working with team of experts to incorporate industry leading best practices into services and solutions as well working with them to enable meticulous implementation strategic priorities
- Expertise in working **Proof of Concept/Prototype** development to pilot and pivot new capabilities
- Closely collaborate with business to drive BI best practices and build strong reporting/data visualization
- Work in **collaboration** with cross-functional teams to maximize value
- Provide effective and timely responses to **ad hoc requests**
- Should have **agile mindset** to continuously improve and augment the solutions via different tools and technologies

### Desirable requirements:

- Masters/ Bachelors in technology/ life-sciences/ management
- Strong technical and functional expertise in analytics
- Experience of 5-7 years in pharma or industry with wide maturity of analytics and reporting
- Experience in excel, PPT storyboard, SQL, Python/R along with data science python libraries, DataIKU

- Should have intermediate to advanced knowledge of applied statistics for analytics
- Consulting, project management and storytelling skills
- Certification in prompt engineering is a good to have
- Ability to bridge the gap between the business team and tech. team by playing the analytics translator role
- Ability to architect and design reporting solutions for broad business/client needs
- Experience with Agile ways of working/ Six Sigma Greenbelt certified
- Experience in understanding and designing wide variety of complex data models
- Expert understanding of enterprise standard platforms, tools and technologies
- Ability to motivate and inspire teams, individuals working on products and projects
- Passion and commitment to drive results through unbossed wow and growth mindset
