Résumé

As a key member of the Analytical Development team, this individual will support developmental activities to aid in delivering gene therapy to patients. The successful candidate will support technical and development projects designed to characterize gene therapy products through an assortment of analytical methods. This role will also contribute to cross-functional activities including monitoring and characterizing of processes and products to identify opportunities for continuous improvement. Growth mentality and passion to serve patients, his/her technical team and development programs is a must.

About the Role

Major accountabilities:

- - Performs a wide variety of laboratory tasks and experiments to collaboratively meet established timelines while maintaining high quality and data integrity.
 - Provides detailed observations, analyze data and interpret results.
 - Authors experimental reports, summaries and protocols.
 - Reviews and approves data generated by other team members.
 - Develops, optimizes, and leads qualification of chromatography (HPLC), Capillary electrophoresis (CE), mass spectrometry (MS) based and other biophysical assays suitable for gene therapy characterization, lot release and stability monitoring, may participate in assay transfer to QC department.
 - Continuously identified areas of improvement to ensure effective laboratory operations.
 - Performs analytical testing including chromatography (HPLC), Capillary electrophoresis (CE), mass spectrometry (MS) based and other biophysical assays etc.
 - Support tracking and trending systems, and programs, which assist in the testing, evaluation and monitoring of quality and efficiency.
 - Assist in drafting and reviewing technical and regulatory documents to ensure completeness, accuracy, consistency and clarity.
 - Present results and project updates to team
 - Work according to appropriate GMP/GLP regulations and Novartis SOPs/Guidelines and Code of

Conduct.

- Other related job duties as assigned.

Requirements:

Expert:

- Bachelor's degree in Analytical Chemistry, Biology, Biochemistry, Molecular Biology, Immunology or related scientific discipline with > 2 years of prior industry experience required. BS with > 5 years, MS with >2 years, Ph.D. with >1 year experience preferred
- Strong understanding and working knowledge of Cell Biology, protein, and DNA chemistry.
- Strong understanding and working experience with chromatography (HPLC), Capillary electrophoresis (CE), mass spectrometry (MS) based and other biophysical assays
- Working knowledge on analytical software including but not limited to Chromeleon, Empower, Chemstation, Astra, 32Karat, Xcalibur, Mascot, and Byonic a plus.
- Quick learner, highly motivated, hard-working and detail oriented.
- Strong ability to work in a fast-paced team environment with highly goal-oriented approaches and to prioritize work from multiple projects with can-do attitude is required.

Desire Experience:

- Excellent written and verbal communication skills.
- Established ability to work in a regulated environment.
- Good presentation skills and scientific/technical writing skills
- Experience working with AAV, LVV analytics preferred.

Senior Expert:

- Bachelor's degree in Analytical Chemistry, Biology, Biochemistry, Molecular Biology, Immunology or related scientific discipline with > 4 years of prior experience in industry required. BS with > 5 years, MS with > 4 years and Ph.D. with > 3 years experience preferred
- State-of-the-art principles and theories in analytical chemistry, protein chemistry, DNA chemistry and related disciplines
- Strong scientific background and understanding of gene therapy, cell biology and drug product development
- Strong working knowledge on analytical software including but not limited to Chromeleon, Empower, Chemstation, Astra, 32Karat, Xcalibur, Mascot, Byonic.
- Demonstrated ability to work collaboratively in a fast-paced team environment and quickly acquire new technical skills and knowledge
- Drives innovation by researching relevant literature to improve existing methodologies while evaluating alternative approaches

The pay range for this position at commencement of employment is expected to be between \$102,400 - 153,600 for Expert & \$124,000 - 186,000 for Senior Expert /year; however, while salary ranges are effective from 1/1/24 through 12/31/24, fluctuations in the job market may necessitate adjustments to pay ranges during this period. Further, final pay determinations will depend on various factors, including, but not limited to geographical location, experience level, knowledge, skills and abilities. The total compensation package for this position may also include other elements, including a sign-on bonus, restricted stock units, and discretionary awards in addition to a full range of medical, financial, and/or other benefits (including 401(k) eligibility and various paid time off benefits, such as vacation, sick time, and parental leave), dependent on the position offered. Details of participation in these benefit plans will be provided if an employee receives an offer of employment. If hired, employee will be in an "at-will position" and the Company reserves the right to modify base salary (as well as any other discretionary payment or compensation program) at any time, including for reasons related to individual performance, Company or individual department/team performance, and market factors.

Why Novartis: Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you.
