

# Assoc. Dir. DDIT Dev. Business Analyst, Global Clinical Operations

Job ID  
REQ-10019759  
Aoû 21, 2024  
Espagne

## Résumé

In this role you will engage with global business leaders and SMEs to determine requirements and deliver data-driven recommendations to improve efficiency and add value. You will also act as an advisor providing guidance to improve global business processes, products, services, and software through data analysis.

## About the Role

### Role Responsibilities:

- Ensure consistency and traceability between user requirements, functional specifications and testing & validation. Support validation and testing (OQ, PQ, UAT, etc)
- Develop project rationale and perform scoping assessments to determine feasibility of projects
- Highlight/identify gaps in existing functionality and review requirements with stakeholders
- Develop comprehensive requirement specifications that will determine the estimate of cost, time and resources to deploy solutions
- Liaise with the service development team to suggest a high level functional solution
- Ensure that relevant stakeholders are involved in specification of new services and/or major upgrades to existing services
- Ensure the overall user experience is taken into account when designing and deploying new solutions and services
- Ensure implemented solutions are according to specifications and fit for purpose.
- Keep abreast with internal IT systems and documentation requirements, standards (including quality management and IT security), regulatory environments / requirements (if applicable), DDIT Service Portfolio and with industry best practices in leveraging technologies for the business and taking advantage of reusable products, solutions and services wherever applicable
- Take accountability to ensure adherence with Security and Compliance policies and procedures within Service Delivery scope

### Role Requirements:

- University degree in Informatics, Computer Sciences, business or similar OR relevant experience
- 12+ years total experience and a strong track record as a Business Analyst, including business process reengineering, user requirements gathering and documentation techniques, Epic and User Story writing techniques, workshop facilitation techniques and change management.
- Good experience working as a Business Analyst in Agile Scrum projects.
- Experience working in the Pharmaceutical Industry, ideally in the Clinical Studies area.
- Excellent interpersonal, communication, collaboration, problem-solving and analytical skills with ability to interact with a diverse internal and external audience to interpret and communicate complex information.
- Ability to influence and exercise business judgment.
- Track record delivering global solutions at scale.
- Self-starter with ability to work autonomously in a highly matrixed and multi-cultural environment, taking full ownership of deliverables.
- Experience in Testing / Computer System Validation.

**Language:** Business fluent in English (written and spoken)
