About the Role

Position Title : Data Steward | Data Quality Steward |

Location – Hyd |India| #LI Hybrid

About the role

Provide analytics support to Novartis internal customers (CPOs & Regional marketing and sales teams) on various low-medium complexity analytical reports. Support and facilitate data enabled decision making for Novartis internal customers by providing and communicating qualitative and quantitative analytics. Support business in building practice by involving in various initiatives like knowledge sharing, on-boarding and training support, support team lead in all business-related tasks / activities, building process documentation and knowledge repositories to be an integral part of a comprehensive design team responsible for designing promotional marketing materials.

Your responsibility includes but not limited to:

- Analyzing and assessing quality of data within a system / use-case by profiling its characteristics, identifying inconsistencies and potential issues, with an aim to improve overall data quality and reliability
- Engagement with cross country stakeholders / Product owners to understand their Data Quality strategy and suggest enhancements wherever needed.
- Working experience on data profiling tools like Ataccama, IDQ to generate reports and insights. Developing and applying data quality metrics to measure overall data health.
- Proficiency in SQL and ETL tools like Alteryx, Dataiku, etc.
- Collaborating with data owners to implement data cleansing processes to correct identified data quality issues, including data standardization and normalization.
- Good understanding on end-to-end data management practices and usage of data governance principles
- Knowledge of data warehousing solutions (e.g. Snowflake). Experience of working with large codebase /

repos using Git / Bitbucket and Strong problem-solving skills and attention to detail.

- Excellent communication and collaboration skills. Ability to work in a matrix environment

Desirable:

- Masters/ PhD in Computer Sciences / IT or other quantitative sciences
- Working experience within the pharmaceutical industry and min of 3+ years of experience in cloud platforms (e.g., AWS, Google Cloud, Azure) and their data services (Databricks).
- Knowledge of real-time data processing and streaming technologies and Proficiency in data visualization tools (e.g., QlikSense, Power BI).
