

Head Health Data Insights & Design

Job ID
391288BR
Mar 12, 2024
USA

About the Role

This role can be based in East Hanover or Cambridge, MA

About the role: (Editable Section unique to each role)

The Head Health Data Insights & Design role combines cross-disciplinary experience and thought-leadership, to define data-driven ways of working and reimaging technology enabled future best practices in the context of planning of clinical programs and trials. Leading multi-disciplinary teams across technology and solutions, data / insights, project management of global initiatives, innovation and development IT across divisions with senior functional experts to demonstrate proof of concept and scalability.

They will employ the latest design-thinking and agile methodologies to render new solutions rapidly available to end-state business owners and users for enhanced productivity and operational efficiency. Collaborate with senior executives across divisions and externally, while capitalizing on opportunities to transform healthcare practices through value-adding external partnerships and alliances to create innovative solutions.

They will have a strong understanding of clinical operations, and technology landscape, with a passion for the sustained delivery of data driven insights for planning clinical programs and trials. An experienced leader guiding members of the organization (direct reports and others) through GCO organizational changes and the evolution of new “product aligned” ways of working and our overall culture. Champions a product-oriented, agile mindset while fostering a culture of experimentation combined with accountable delivery and overall high performance.

Your responsibilities:

Your responsibilities include, but are not limited to:

- Develops the strategy, planning and implementation of Health Data Insights & Design services; providing guidance and leadership across all business areas within the organization, and therefore acts as an interface to align and synchronize transformational approaches / assets across the enterprise.
- Accountable for the delivery of best-in-class, high quality health insights data to GCO sub-teams across all therapeutic areas enabling data-driven decision making and positively impacting operationalization of clinical programs and trials.
- Ensure effective delivery of high-impact ‘must-win’ transformative programs to implement new engagement, practices and business models. Lead cross-divisional transformative projects as assigned, leading to improved overall business and technology performance.
- Develop processes and systems that facilitate the roll-out of ‘scalable experiments’ across the business.

Work with GCO LT, Innovation Capability Heads and line functions to explore key areas of impact for transforming operations and create “wild-card” solutions to revolutionize the model. Gathers feedback, assess

pain points, and propose solutions while managing stakeholder expectations

- Practice agile execution and design thinking methodologies / user journey mapping alongside robust project management and cross-functional collaboration
- Drive greater strategic intent; bringing trial participant, data and measurement centrality to the core of GCO processes in alignment with key customer journeys (patient, site, physician, sponsor)
- Acts as a thought-leader to drive transformative solutions within GDD, incorporating industry-agnostic thinking and progressive actions to transform GCO operations with simplified results for line functions and end users.
- Remains aware and informed of current industry trends beyond pharma, including new ways of working, organization design and break-through technologies, solutions and innovations. Builds strong, enduring collaborations with external partners in complementary industries to accelerate transformative activities
- Full member of the PSP leadership team and of the related decision boards.

Diversity & Inclusion / EEO
