Sommario

Our Development Team is guided by our purpose: to reimagine medicine to improve and extend people's lives. To do this, we are optimizing and strengthening our processes and ways of working. We are investing in new technologies and building specific therapeutic area and platform depth – all to bring our medicines to patients even faster. We are seeking key talent, like you, to join us and help give people with disease and their families a brighter future to look forward to. Apply today and welcome to where we thrive together!

About the Role

Purpose:

The Technical Project Leader will, jointly with the CMC team, lead and manage all technical development activities for assigned small molecule projects within Technical Research & Development (TRD); represent TRD as core member in global project teams to define the global CMC strategy for the development, submission, approval and life cycle management of a product(s); improve the support to local programs and partners; lead CMC teams with strong strategic focus, quality & environmental awareness, scientific and technical expertise; act as the TRD representative in complex projects involving external partners and/or highly innovative projects/processes.

Major Responsibilities but not limited to :

- Lead the establishment of a scientifically & regulatory sound and business driven CMC project strategy including risk assessments and contingency planning, in line with overall global development project strategy and together with assigned CMC team.
- Ensure alignment with departments and functions inside and outside of TRD as well as 3rd parties as appropriate. Drive endorsement of CMC project strategy by respective Novartis boards.
- Proactively communicate overall project strategy, key risks, issues and any other critical topics in a timely manner to the appropriate management level, customer and team members. Ensure that issues are resolved in a timely fashion.
- Understand and proactively manage the cross-functional aspects of assigned project(s) among departments within and outside TRD (e.g. Regulatory, Safety, Clinical, Production, Research). Lead the CMC subteam(s) in a complex international matrix organization in line with the culture, values and behaviors of Novartis.
- Build strong team spirit and promote knowledge exchange within and between teams. Align project objectives and priorities with team(s) members. Support in- and out licensing of projects by shaping global technical development strategy for post-due diligence projects under negotiation.

Minimum Requirements:

- Education: Ph.D. or equivalent in chemistry, biochemistry, biotechnology, biology, pharmacy or related science.
- Minimum 8 years of experience within the pharmaceutical industry, preferably in the field of technical development; minimum of 5 years of experience in a leadership position.
- Demonstrated minimum of 3-5 years project management excellence in technical development department (e.g. several years of experience as CMC project leader or senior line function position) or equivalent experience.
- Proven track record in successfully leading interdisciplinary teams, e.g. scientists working on technical or methodological projects (incl. budget control), in Technical R&D or equivalent experience. Proven ability to work proactively and think strategically, including assessment of business impact of technical decisions.
- Excellent verbal and written communication skills with success in building trustful relationships and influencing others in cross-functional areas including customer management.
- Excellent knowledge of the Pharma Drug Discovery & Development process.

Commitment to Diversity & Inclusion:

We are committed to building an outstanding, inclusive work environment and diverse teams' representative of the patients and communities we serve.
