## Sommario

**Job Description Summary** The Automation Engineer II is responsible for participating on automation design teams and supporting specific systems for a Novartis gene therapy manufacturing facility. This includes responsibilities for helping to maintain, troubleshoot, and modify the GMP and non-GMP control systems. Systems include plant wide DCS (DeltaV), BMS (Rockwell SCADA) and 3rd party local control systems. Novartis is unable to offer relocation support for this role: please only apply if this location is accessible for you.

## About the Role

### Responsibilities:

- Helps to maintain, troubleshoot, and modify the GMP and non-GMP control systems
- Participate in the design, configuration, installation, and maintenance of automation software and associated hardware, including interacting with other teams as necessary
- Prepare scopes of work for small to medium sized automation projects
- Develop project objectives working with user requirements and business plans
- Participate in discussions with internal business partners on priorities, timelines and transparent sharing of information
- Develop/update equipment specifications in standard documentation – User Requirements (URS), Functional Specification (FS) and Detail Design Specifications (DDS/HDS/SDS)
- Maintain procedures to meet GMP requirements, CFR's and internal company policies
- Support 24x7 site-based operations including rotating on-call responsibilities.

### Requirements:

- B.S. degree in Engineering, Computer Science, or related technical field or 6 years of equivalent work experience in lieu of degree
- 2 years' work experience in pharmaceutical or biopharmaceutical based GMP manufacturing operations; or 6 years equivalent work experience
- Experience programming, troubleshooting and start-up of PLC and/or DCS systems and troubleshooting manufacturing equipment utilizing these systems. DeltaV DCS and Rockwell PLC experience preferred
- Working in a team environment, with excellent communication and organizational skills
- Experience in executing test protocols for automation system level commissioning and qualification
- Experience executing change controls in change management systems
- Working knowledge of field device signal wiring practices/panel design, instrumentation and modern industrial communication protocols
- Familiarity with FDA regulations particularly 21 CFR part 11 and GMP systems.
