Sommario

Machine learning/Data science internship to work with predictive modeling and uncertainty estimation in the context of molecular property prediction and cheminformatics.

About the Role

Duration: 6 months

Start: as soon as possible

Location: Campus Basel

Major accountabilities:

- Develop ML models for compound property predictions
- Implement, apply and benchmark uncertainty estimation methods for ML models
- Work in a multidisciplinary environment
- Present project outcomes to technical and non-technical audiences

Minimum Requirements:

- MSc in a quantitative field or life sciences, preferably with multidisciplinary background (cheminformatics, bioinformatics, biomedical data science)
- Strong understanding of statistics and experience with machine learning / deep learning
- Expert knowledge of Python
- Experience with reproducible data science tools and practices
- Excellent communication skills and ability to translate analytical concepts for diverse audience and stakeholders (English is our primary language)

Desired:

- Previous research experience either in academia or industry
- Experience with uncertainty quantification
- Knowledge of explainable AI

Skills:

- Python
- Statistics, machine learning, deep learning, predictive modeling

Languages :

- English

Accessibility and accommodation:

Novartis is committed to working with and providing reasonable accommodation to all individuals. If, because of a medical condition or disability, you need a reasonable accommodation for any part of the recruitment process, or in order to receive more detailed information about the essential functions of a position, please send an e-mail to diversity.inclusion_ch@novartis.com, and let us know the nature of your request and your contact information. Please include the job requisition number in your message.

Why Novartis: Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you. Collaborating, supporting and inspiring each other. Combining to achieve breakthroughs that change patients' lives. Ready to create a brighter future together? <https://www.novartis.com/about/strategy/people-and-culture>
